Quality

Affordable

# Aluminium

How does Aluminium perform compared to other materials commonly used for doors and windows?

When compared to wooden frames, Aluminium frames are much **stronger** and does not **swell** or **rot** due to humidity. When compared to steel frames, Aluminium weighs a lot **less** and does not **rust**.

Aluminium handles the hot and humid South African climates really well and generally costs **less** than wooden frames.

- └ Aluminium Windows
- └ Aluminium Doors
- └ Aluminium Balustrades
- └ Aluminium Garage Doors
- └ Aluminium Shopfronts

# Other Services

## 3D Signage:

3D Signs are extremely popular right now - not just for their beautiful look, but also for their practicality. Our smoothly backlit 3D signs attract the attention of customers in any lighting conditions.

3D signage physically stands out and you can achieve any desired effect with the printed layering - perfect for finely detailed- and multi-colored artwork.

## NEON Signage:

Neon is well known and with good reason! We all know and love the funky, yet soothing glow!

Neon signs are famously known to be in nightclubs - but with the right color scheme it can fit any business: i.e. bars, spa's, restaurants, accommodation, tech shops and a whole list of other industries!

Neon signs can be letters, numbers and even logos - truly versatile.

## Tinted Signage:

Having all-tinted windows but want to display your brand from the inside should never be a problem. We apply a custom tint in the shape of your company logo, wording and any of your promotional materials!

## Smart Systems

Alexa. Your virtual assistant, your virtual friend. Name her what you want, change the voice to Samuel L. Jackson if you want. Alexa can control smart products based on your voice commands to make your life a lot easier. Alexa can set up meetings, keep track of your calendar, manage your shopping list for you and do tons of incredible things

## Flick-it Systems

Gate and garage access control just got really cool! Why worry about where you misplaced your remote(s) if you can integrate it to work with your car? No need to constantly replace remote batteries and the system only allows your own vehicles access to your property.

The ease of use is incredible. Simply flick your headlights once to open/close the gate and twice to open/close your garage doors!
